COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
COMPUTER: IBM PC compatible
COMPUTER: PATEM: PC-DOS/NS-DOS
SOFTWARE: PATEMIN Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/709,173
FILING DATE: 06-SEP-1996
CLASSIFICATION: 435
                                                                                                                 US-08-709-173-85
; Sequence 85, Application US/08709173
; Patent No. 5712145
; GENERAL INFORMATION:
; APPLICANT: HOUGHTON, MICHAEL
APPLICANT: CHOO, QUI LIM
; APPLICANT: CHOO, QUI LIM
; APPLICANT: ROO, GEORGE
; TITLE OF INVENTION: HEPATITIS C VIRUS PROTEASE
; VUMBER OF SEQUENCES: 86
; CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Length:
